Re Fort Collins/Loveland Hot-In-Place Recycling Project

Dear Mr O'Neill

This letter will help to qualify our bid

Gallagher Asphalt proposes to Hot-in-Place recycle, rejuvenate, and recompact the existing asphalt in one pass. The one inch hot mix overlay will then be placed by Laforge within 48 hours of Hot-In-Place recycling. This allows more complete compaction of individual layers of material, as well as, less interruption of traffic. This method is used extensively in Chicago and surrounding suburbs. Gallagher Asphalt alone does in excess of one million square yards per year under these methods.

The trucking is figured using City of Fort Collins trucks per the 4/24/2000 specifications. Dictation of the City truck start times and numbers of trucks will be by Laforge. Production rates vary from 60 to 120 tons per hour. Additional tandem trucks needed will be billed at \$66 00/hour.

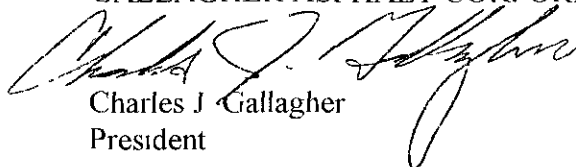

Traffic Control should be kept to a minimum since cars can drive on the recycled surface immediately after rolling.

The Gallagher Asphalt team looks forward to working with Fort Collins and Loveland on this project.

If you have any questions, please do not hesitate to call. I can be reached at 800/536-7160 or [www.charlieg@gallagherasphalt.com](mailto:www.charlieg@gallagherasphalt.com)

Sincerely,
