MEMORANDUM

DATE February 28, 1997  
TO John Stephens, Purchasing  
FROM Dan Holland, Traffic Supervisor  
RE Directional Boring Cost

The following drawing is a typical traffic signal intersection that the Traffic Department would need to have directional boring done  
We would like to obtain a cost for the directional boring per linear foot, and the cost per pot hole to locate utilities  
The bore would need to an minimum of 36 inches under the roadway and would need to be 3 inch SCH 40, PVC conduit  
The average intersection would have between 150 - 250 LF to bore
