**DESMAN ASSOCIATES**  
 ARCHITECTS-ENGINEERS-PLANNERS

DESMAN Associates is a national firm specializing in the planning, design and restoration engineering of multi-level parking structures. Founded in 1973, the firm has planned and/or designed over 700 parking facilities built throughout the United States and abroad. In addition, the firm has been the restoration engineer on another 600 existing parking garages. Services include: parking demand, master planning and financial feasibility studies; functional design; architecture; structural, traffic, waterproofing and concrete restoration engineering; parking operations and access/revenue control consulting.

**Larry Donoghue Associates**

 Park Ridge, IL 60068-1433  
 847.297.1180, Fax: 847.297.1103

Larry Donoghue & Associates has over 30 years experience evaluating the integrity and efficiency of parking revenue control systems. His extensive research has uncovered more than 230 different ways for patrons to cheat or employees to steal from cashier-attended parking facilities or from parking meter systems. He has conducted comprehensive evaluations of more than 200 parking facilities, including municipal parking facilities, airports, hospitals, universities, stadiums, racetracks, and parking facilities operated on behalf of building owners. The evaluations detected 70 to 310 weaknesses in those revenue control systems. He recommended cost-effective means of remedying all of the perceived weaknesses. **EXPERT WITNESS SERVICE:** Donoghue also provides expert witness services regarding any aspect of parking facilities construction, maintenance or operations.

The City of Ft Collins is issuing the RFP to your company.

The complete Title is:

P1017 Analysis of Alternatives for the Upgrade and/or Replacement of  
the City's Existing  
Parking Access and Revenue Control System

The purpose of the project:

The City of Fort Collins, Colorado, will upgrade and/or replace the existing access and revenue control equipment and software in two parking structures because the current system is outdated and requires considerable maintenance; and the existing system does not offer the latest features and technology advances which can enhance the City's parking operations. The City wants to investigate new technologies that have become available since we purchased the existing system eight years ago. We are interested in using technology to enhance our operations and do our business better. We want to provide the best possible service to our customers as they enter, park, and exit the parking structures. We want to be able to offer and charge for flexible parking products, and have a method for auditable revenue control and

accountability. We are interested in an analysis that shows the pros and cons of various alternatives as well as cost estimates for different solutions to accomplish these objectives.

Please go to <https://secure2.fcgov.com/purchasing> to download a copy of the RFP. Please call John Stephen at 970-221-6777 if questions.
