RE: Pizza Hut at Arbor Plaza

Dear Glen:

We have surveyed the as-constructed elevations of the building floor, pavement and curbs at the Pizza Hut site at Arbor Plaza.

The only place the elevation of the pavement was substantially changed from that shown on the construction plans is at the drive-up window. The pavement was raised about 0.6 feet adjacent to the drive-up window, but this in no way causes any drainage problems or any potential flooding.

I have shown the as-constructed elevations in red on the attached print.

Please call if you need further information.

Sincerely,

Phillip I. Robinson, P.E. & L.S.  
Vice President
