

ORDINANCE NO. 168, 2018  
OF THE COUNCIL OF THE CITY OF FORT COLLINS  
AMENDING CHAPTER 26 OF THE CODE OF THE CITY OF FORT  
COLLINS TO REVISE SEWER PLANT INVESTMENT FEES

WHEREAS, the City Council is empowered and directed by Article XII, Section 6 of the Charter of the City of Fort Collins, to by ordinance from time to time fix, establish, maintain, and provide for the collection of such rates, fees or charges for water and for other utility services furnished by the City as will produce revenues sufficient to pay the costs, expenses, and other obligations as set forth therein; and

WHEREAS, Article IV, Chapter 26 of the City Code establishes and sets forth the wastewater utility as a utility service furnished by and an enterprise of the City; and

WHEREAS, City Code Sections 26-283 and 26-284 provide for sewer plant investment fees ("SPIFs") to be based on and used for growth-related capital expansion costs of wastewater collection, transmission, treatment, and administrative facilities that are reasonably related to the overall costs of and required in providing wastewater services to serve new development; and

WHEREAS, City Code Section 26-283 further requires that the City Manager annually review the parameters and rates of the SPIFs and also requires that the City Manager present such fees to the City Council for approval no less frequently than biennially; and

WHEREAS, the City Manager and City staff have also recommended to the City Council adjustment of the SPIFs as set forth herein to be effective January 1, 2019; and

WHEREAS, the Water Board considered the proposed SPIFs adjustments for 2019 at its meeting on October 18, 2018 and recommended approval of the proposed adjustments by a unanimous vote; and

WHEREAS, based on the foregoing, City Council desires to amend Chapter 26 of the City Code to adjust the scope and rate of the PIFs as set forth herein.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes any and all determinations and findings contained in the recitals set forth above.

Section 2. That Section 26-284 of the Code of the City of Fort Collins is hereby amended to read as follows:

**Sec. 26-284. - Sewer plant investment fees and surcharges established.**

(a) The schedule of sewer plant investment fees, subject to the exceptions and additional requirements provided in this Section, is as follows:

Category	SPIF		
A	Single-family	Per dwelling	\$3,537
B and C	Duplex and Multi-family	Per each dwelling unit or mobile home space	\$2,588
D, E, F	Non-residential and Industrial		
	Water meter size (inches)	Fee	Fee
	¾		\$7,518
	1		\$16,553
	1½		\$31,728
	2		\$65,813
	3 and above	Calculated on an individual basis based on peak wastewater flow (determined in the manner set forth hereinafter) but not less than the charge for a two-inch meter	
G	User outside	Same as equivalent category, plus any special sanitation district fees	
H	Special	Determined pursuant to Subsection (d) of this Section	

...

(d) The amount of the plant investment fee and surcharge for each nonresidential surcharged user, users in Category H and any user that is expected to generate greater than its proportionate share of peak day flow at the treatment plant for the applicable category (including both contributed wastewater volume and volume related to infiltration and inflow), shall be calculated utilizing the following formula:

$$\text{SPIF} = \text{Site Flow} \times [\text{Flow}_s + (\text{BOD} \times \text{BOD}_s) + (\text{TSS} \times \text{TSS}_s)] + \text{I\&I Flow} \times [\text{Flow}_s + (200 \text{ mg/l} \times \text{BOD}_s) + (250 \text{ mg/l} \times \text{TSS}_s)]$$

Where:			
SPIF	=	Plant investment fee for Category H users and users discharging wastewater with average concentrations of BOD and/or TSS which exceed those average concentrations which are set forth in § 26-282(b) under Category E-34	
Site Flow	=	The user's proportionate share of peak day flow at the treatment plant based on site flow discharge from user's site	
I&I Flow	=	That proportionate share of peak day flow due to infiltration and inflow as allocated to user's site flow discharge. I&I Flow is calculated based on Site Flow multiplied by	46.5%
Flow <sub>s</sub>	=	Unit cost of facilities attributable to treating wastewater flow	Per Gallon \$9.19
BOD	=	Average BOD concentration for user category or measured BOD concentration for the user as determined in accordance with Subsection (c) of this Section, but not less than 200 mg/l	
BOD <sub>s</sub>	=	Unit cost of facilities attributable to treating BOD	Per mg/l \$0.0143
TSS	=	Average TSS concentration for user category or measured TSS concentration for the user as determined in accordance with Subsection (c) of this Section, but not less than 250 mg/l	
TSS <sub>s</sub>	=	Unit cost of facilities attributable to treating TSS	Per mg/l \$0.0114

...

(f) For purposes of this Section, the proportionate share of peak day flow at the treatment plant for users in Categories D, E and F shall be deemed to be:

Water Meter Size (inches)	Peak Flow (gallons per day)
¾	491
1	1,081
1½	2,072
2	4,298
3 and greater	Calculated on an individual basis based on user's proportionate share of peak day flow at the treatment plant (including both contributed wastewater volume and volume related to infiltration and inflow) but not less than the peak day flow for a two-inch meter

Section 4. That the modifications set forth above shall be effective for all fees paid on or after January 1, 2019.

Introduced, considered favorably on first reading, and ordered published this 4th day of December, A.D. 2018, and to be presented for final passage on the 18th day of December, A.D. 2018.
