City Council Work Session November 13, 2018 6:00 PM

● **CALL TO ORDER.**

1. Regulating Shared Electric Scooters. (staff: Amanda Mansfield, Paul Sizemore; 15 minute staff presentation; 45 minute discussion)

The purpose of this work session is for Council to provide staff direction on proposed policies and practices for successful shared electric scooter (e-scooter) management. Shared e-scooters are a rapidly emerging mobility service. Experience from other cities has shown the need to regulate the operations of these services. Currently no e-scooter companies operate in Fort Collins, however companies have been inquiring with the intention of coming to Fort Collins. To be prepared, the City is investigating the following:

- Updating the Downtown Dismount Zone to exclude e-scooters.
- Existing City policy or City Code regulations that are applicable to e-scooters.
- Whether any changes are needed to existing City policy or City Code regulations related to e-scooters.
- The right operational model for Fort Collins regarding e-scooters.
- How to best address public safety concerns through enforcement of existing City Code regulations related to encroachment and accessory use violations.

2. 2019 Fee Update and Fee Group Findings. (staff: Jennifer Poznanovic, Mike Beckstead; 10 minute staff presentation; 30 minute discussion)

The purpose of this item is to review the Fee Working Group position paper and fee updates associated with Step II Capital Expansion Fees and Wet Utility Plant Investment Fees. Since the fall of October 2016, staff has worked to coordinate the process for updating all new development related fees that require Council approval. The 2017 Capital Expansion Fee (CEF) and Transportation Capital Expansion Fee (TCEF) full fee proposals showed significant increases from the previously approved fees. Council asked for these fees to be implemented in three steps. The 2019 update includes Step II for CEFs and TEFs along with Wet Utility Plant Investment Fees (PIFs).

Staff proposes the following fee updates:

- 90% of proposed CEFs (Step II)
- Option A for TCEFs (Step II)
- Wet Utility PIFs as proposed

Due to the concern in the development and building community around impact fee changes, Council asked for a Fee Working Group to be created to foster a better understanding of impact fees prior to discussing further fee updates. The Fee Working Group meetings commenced in August of 2017, comprised of a balanced group of stakeholders - citizens, business-oriented individuals, City staff and a Council liaison. The group met 14 times, and the background, findings and recommendations are presented in a position paper. Overall, the Fee Working Group supports the fee coordination process and proposed fee updates.

3. City Plan Scenarios Update - Community Feedback. (staff: Cameron Gloss, Aaron Iverson; 15 minute staff presentation; 45 minute discussion)

The purpose of this item is to update Council on community feedback and reaction to the three City Plan scenarios. Staff will provide an overview of areas of alignment and areas of tension based on community input, and implications for developing a preferred scenario based on results.

- **OTHER BUSINESS.**

- **ADJOURNMENT.**
