

Requisition Form

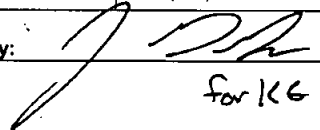

Vendor: Ingram Drilling, Inc 490880
PO Box 342
Estes Park, CO 80517

Today's Date: February 14, 2013
Ship To: _____
Vendor #: _____
Special Instructions: Work Order :
I-WRF-2013-1 2013, MSR Stockwell Project

Requisition No.: 43953
Date Entered: 2/19/2013 AMM
Date Approved: _____
Date Denied: _____

Item #	Quantity	Unit	Description	Unit Price	Total	Charge Number
1	1	Lot	Contractual Services for Construction of new 160 lf well and production testing	\$13,127.45	\$13,127.45	5036315403.529999.6
2	1	Lot	Abandonment of well #26542-A	\$6,600.00	\$6,600.00	5036315403.529999.6
3	1	Lot	Abandonment of well #26537	\$4,815.10	\$4,815.10	5036315403.529999.6
Total					\$24,542.55

Link: Attached find the estimate for test hole drilling we discussed at our meeting on 12/20/12 I have included associated costs for testing the alluvial formation (which after looking at it with Dean Cox, I do not believe there is going to be much as far as depth of it) as well as drilling to the depth of 160 ft max. That is the depth of the closest well that is productive in this area.

The estimate also includes costs for installing the casing and completing as a production well in the event we find adequate supply of water at this location, but you are not obligated to do that part, it will save you some money if you choose to as you would spend this money now and just have to come back later and do it over again.

Let me know if you have any questions. If I do not talk to you have a Merry Christmas and Happy New Year!

Respectfully

Stephen E. Ingram

 TEST WELL AND PRODUCTION TESTING [REDACTED]

QUANTITY	DESCRIPTION	PRICE	AMOUNT
1	Mobilization/Demobilization w/tailings pit excavations	\$575.00	\$575.00
50	Lin Ft Drilling 12.75" surface borehole for alluvial formation	50.00	\$2,500.00
	testing open hole if possible(Estimated depth only/ variable)		\$0.00
2	Hrs air lift testing alluvial formation for H2O production	240.00	\$480.00
60	Lin Ft 8.625" Steel surface casing installed (Seal off alluvial	30.00	\$1,800.00
	formation to advance borehole to deeper depth and check for		\$0.00
	water bearing strata below alluvial formation)		\$0.00
100	Lin Ft Drilling 8.0" test borehole into White River/Fox Hills sands	22.00	\$2,200.00
	formations and check for water bearing strata		\$0.00
155	Lin Ft 5.5" SDR210.D. PVC Liner Production casing(casing will	6.25	\$968.75
	be utilized only in event a viable water source is located)		\$0.00
140	Lin Ft #8-12 Silica sand pack installed wd method	11.00	\$1,540.00
4	Hrs Air Lift testing White River/Fox Hills formations for H2O	240.00	\$960.00
	production(this item applicable in event a viable water source is		\$0.00
	located)		\$0.00
48	Bgs spec mix cement grout prod#27494	20.95	\$1,005.60
2.5	Hrs w/30-500 cement grout pump unit w/trem pipe install	250.00	\$625.00
1	WCB8D sanitary well cap	473.10	\$473.10
	Should quantities vary from estimate the unit prices will prevail		\$0.00
	Total		\$13,127.45
