RE: Fort Collins Office Closure

Dear Carol:

In order to centralize operations and better serve our clients, Walsh has closed its Colorado Springs and Grand Junction offices and will close the Fort Collins office by the end of 2014. With closing these offices, Walsh will no longer provide asbestos services.

We continue to direct our environmental consulting operations from our Boulder headquarters and provide additional environmental engineering services from our Lakewood office. In addition, Walsh is working closely with our parent company Ecology & Environment, Inc., to utilize our network of almost 1,000 scientists and engineers to help you find solutions to help meet your environmental needs.

Walsh acknowledges that we have an ongoing contract with the City of Fort Collins and we will honor our obligations through the end of the contract (February 2015). Troy Sanders will be your local contact after December 15, 2014 and will remain on staff to respond to your needs. Walsh will not renew our contract in 2015.

If you would like more information about our services or have other questions, please contact me [jforti@ene.com](mailto:jforti@ene.com) or Jon McClurg [jmcclurg@walshenv.com](mailto:jmcclurg@walshenv.com) or at 303-443-3282.

Regards,

A handwritten signature in black ink that reads "Joe Forti".

Joe Forti
