Mr. Gordon Clyde
Chief Building Inspector
300 LaPorte Avenue
Fort Collins, Colorado 80521

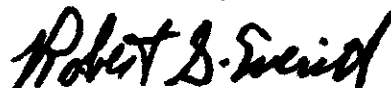

Dear Clyde:

Mr. Harold Miller has recently shown you a plan for a room addition on the south side of our residence located at 2413 Brookwood Drive. Because this plan included a range and oven, he felt that it would be necessary to clarify what we are intending to use this room for.

As you know, my work makes it necessary for me to be gone a great deal of the time, and since I now would like to be able to take my wife with me on these trips, we would like to be able to hire a person who could take care of our house and grounds, both from a security aspect as well as from the upkeep of the property, when we are gone. As you also know, my mother lives across the lake to the north from our home, and I would like this person to also act in a security capacity and upkeep capacity for her and her residence while we are gone and also on those occasions when she is out of town. We would never intend to rent this space to any person other than someone in this capacity. I would very much appreciate being granted a permit for this room addition based on this need.

I would hope that this letter would held in the strictest of confidence in that I do not particularly want people knowing that we have someone in this capacity living at our residence.

Yours very truly,

Robert S. Everitt
