

To Whom It may Concern,

120 S. College

I've been asked to explain a problem here at Bisetti's Restaurant, and give our solution to the problem.

We are planning to put an 8' x 12' walk-in refrigerator at the back of our restaurant. In doing so, we will take up an employee parking spot. We presently provide parking for 4 automobiles. People (employees) who cannot park behind the building always use the Elk's parking lot and use the money meter spots, or they use the parking garage on Remington. This kind of system has been going on since Bisetti's was first opened.

My personal opinion is I know the problems related to parking in the downtown area. Believe me, nobody wants to see more parking than Bisetti's, it would only help our business; so we are not going to jeopardize any public parking if possible!

Thank You

Bisetti's
