	<b>Applicant:</b> Path 21 Architects				720-878-4900
	<b>Primary Contractor:</b> SWINERTON BUILDERS		260 Townsend St, San Francisco, CA 94107		415-421-2980
	<b>Work Description:</b> This is for the Cancer Center: Scope of work is primarily low voltage signal cabling and conduit for non-plenum rated cabling. Some electrical work is being required to provide power to the Identify System. Work may involve penetrations of and patching of existing fire rated walls and/or ceilings. Owner Authorization on file. JOB CONTACT: TBA The treatment system, which is the Linear Accelerator is not being affected in this installation. The Identify System is basically an automated patient verification system that "identifies" a patient, provides motion management during the procedure, and ensures the right patient receives the right treatment. Some of this is done via tracking of the patient through a palm reader, which we have located by the entry of the rooms. Four new cameras will be mounted at each LINAC vault (treatment room) and two in the CT room. The new monitors/cameras will allow the therapist to have the same setup for each patient every time.
