Dear Mr. Busch:

As you are aware, the former bowling alley building at 2105 South College was extensively remodeled for occupancy by the Century Magnovox retail sales store in 1970. At that time, the City received your assurance that the west portion, which was not remodeled, would be brought into conformity with the requirements of the building code and the fire prevention ordinance. The contractor, Reid Burton, provided additional openings so that the requirements for an automatic fire extinguishing system was obviated; but providing one hour fire protection for the roof and its supporting structure has never been completed. My purpose in writing is to obtain a commitment from the owners as to when the west area of the building will be completed. Your prompt attention to this matter will be greatly appreciated.

Very truly yours,
For the City of Fort Collins

Gordon F. Clyde
