RE: Long Apartments
220 E. Laurel

Dear Mr. Lee:

This is the proposed plan to bring the Long Apartments up to your fire code standards. A smoke detection system will be added to the alarm system installed in 1982. The system will have a smoke detector located in each hallway of the four floors. These will be connected to a 4-zone annunciator panel located by the front door.

The floor plans for the fire wall/doors to be installed in each floor are also enclosed. Following your approval of these plans, we will proceed with the installation.

Sincerely,

Dr. Howard O. Nornes
Mr. Dick Anderson
