Subject: Council SAR #27184 / Tonight's Agenda Items 9 & 10 (Community Solar Garden)

Hi Ross,

Per Norm Weaver, Sr. Energy Services Engineer, the current subscription level in the Fort Collins Community Solar Project is reported by the Clean Energy Collective (CEC) as 46% (152kW) of the proposed "phase I" solar array capacity (333kW) with 52 subscribing customers. These contingent reservations are secured by a 10% deposit from the subscriber.

I will include a copy of this response in your read-before packet this evening.

Regards,

Wendy Bricher

Darin,

I believe Clean Energy Collective has been signing up customers toward this project for some time now. Do we know how many customers have signed up, and what percentage of the proposed array is subscribed? It would be helpful to know before tonight, if possible.

Thanks,
Ross
