RE: End of Year Report

The Commission on Disability continues to review plans submitted to the Building Inspection Office for accessibility.

The new ADA rules and regulations were reviewed and discussed at length with members on the commission. Other organizations were invited to attend video presentations and discussion on ADA rules.

The Snow Removal Slide Program was completed and is now available to organizations throughout the City for viewing.

A joint committee was established with the Building Review Board to develop criteria for providing guidance when granting "exceptions" to the state accessible housing law.

The Commission again hosted their annual Mayors Award in October.
